Chemical

Indian Dairy Equipments & Fabricators (IDEF) into manufacturing and fabricating of dairy equipments for food processing, catering to the needs of hygienic application in various sectors like Dairy, Food & Beverage, Pharmaceutical, Chemical industries.

Our success is attributed to our customer loyalty and satisfaction. Constantly developing new products and providing high standard, intricate components at competitive prices to our clients is the main objective, and our enthusiasm for providing excellent service by following Quality Management Systems in administration and production.

Values: Total commitment to quality, durability and reliability. Going the extra mile with our clients to establish a successful and long-term business relationship. Constantly seeking ways and means to provide higher level of customer satisfaction. Extensive market research to understand and meet with the growing demands of the industry. Continuously upgrade quality standards in line with the trends for the future thereby benefiting the customer.

Special Services: We undertake turnkey projects as per customers requirements. We can develop your product against samples for your specific requirements. We can also partner with you in developing new products.

Vow to our Customers: At the end of the day, our only assets are our clients and our reputation. We need to exceed each and every expectation that our client has - this means we also have to anticipate and manage future expectations. This also means never over-committing.

RAW MILK RECEPTION DOCK

Rollar Conveyor

Weighing Bowl

Dump Tank

Can Drip Saver

Lid Wash Throw

Can Scrubber

STORAGE EQUIPMENTS

Vertical Milk Storage Tank

Road Milk Tanker

CIP System

Cleaning in place (CIP system) of cleaning the interior surface of pipe line, vessels, filters, process equipment & associated things without dismantling. Industries that require high level of hygiene rely on CIP and they include dairy, beverages, brewing, pharmaceutical, processed foods & cosmetics.

Crate Washer

Can Washer

Crate and can washers cut time, water and labour costs by automating the process. Simply place dirty crates and cans on the conveyor, then remove them sanitised from the wash unit. Widely used in the agriculture, food processing, pharmaceuticals and hygiene sectors.

Belt Conveyor

Chain Conveyor

Screw Conveyor

PUMPINGS

The sanitary pump is designed to handle liquids with different viscosities with the liquid producing either positive or negative suction on the pump inlet. Depending on the product to be pumped, the pump can be supplied: Closed Impeller, Semi Open Impeller, and Open Impeller.

Application:

Dairies,
Beverages,
Food Stuffs,
Chocolate & Sweets,
CIP Cleaning Process,
Pharmaceutical

CUSTOMISED PRODUCTS

Customised Ghee Boiler

Butter Trolleys

Agitating Vat

We provide custom stainless steel fabrication services for the manufacture of process tanks and vessels, storage vessels, mix systems, skidded systems and more.

Ventury

Curd Cup Trolley

Curd Settling Tanks

SS Tray

VALVES

Plug Valve - 3 Way

Plug Valve - 2 Way

Flanged End Plug Valve

Butterfly Valve

Pressure Relief Valve

Angular Valve

Check Valve (NRV)

Flow Diversion Valve

Micro Valve

FITTINGS

Double Seat Pneumatic Valve

Single Seat Pneumatic Valve

Pneumatic Butterfly Valve

Pipe, pipe connections & fittings are available in all common standards, feature smooth surface & reliable connections
